DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8-11, 13-16, 18-21, 23-26, and 29-32 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8, 13, 18, 23, and 29 recites the limitation "the pair line" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7, 12, 17, 22, 27, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell (U.S. Patent 5,930,340).

Regarding to claim 1, Bell discloses an arrangement of a local area network 125 in a customer's premise 103 (Fig. 1) comprising a gateway 111 through which the local area network is connected to an outside network (PSTN or WAN) via an XDSL subscriber line 105 (Fig. 1 col. 4 lines 30-50), in which local area network band division filters 127 are connected to sockets 309 (Fig. 3 col. 44-51) of the local area network for separating voice band signals and traffic of the local area network both the voice band

signals and the traffic distributed by the local area network (Fig. 1 col. 5 lines 61-67 and col. 6 lines 1-6), and for connecting voice band terminals and network stations to the local area network (Fig. 2 col. 6 lines 7-24).

Regarding to claim 2, Bell discloses wherein transmission lines of the local area network are formed from telephone lines in the customer's premise (Fig.1 col. 4 lines 51-65).

Regarding to claims 3 and 6, Bell discloses wherein the local area network is a HomePNA network (col. 2 lines 32-35).

Regarding to claim 4, Bell discloses wherein the XDSL sub-scriber line is an ADSL line (Fig. 1 col. 4 lines 20-23).

Regarding to claim 5, Bell discloses wherein the gateway is an ADSL terminal (Fig. 1 col. 4 lines 41-44).

Regarding to claims 7, 12, 17, 22, and 28, Bell discloses the band division filter 301 comprises two parts, the first part being formed from a low-pass filter 311 between the voice band terminal and the local area network, and the second part 313 being formed from a band stop filter between the network station and the local area network (Fig. 3 col. 6 lines 7 lines 1-18).

Regarding to claim 27, Bell discloses a filter 301 (Fig. 3 col. 6 lines 44-46) for a local area network 125 in a customer's premise 103 (Fig. 1 col. 4 lines 51-65) wherein the filter is connected to a socket 309 (Fig. 3 col. 6 lines 48-51) of the local area network for separating voice band signals and traffic of the local area network both the voice band signals and the traffic distributed by the local area network, and for connecting

voice band terminals and network stations to the local area network (Fig. 3 col. 7 lines 1-18).

Allowable Subject Matter

5. Claims 8-11, 13-16, 18-21, 23-26, and 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
